

COLD TAPE WRAPPING

Our team has a proven track record in hydrocarbon fire protection on oil & gas

Cold Tape Wrapping

- **Client:** NCOC
- **Contractor:** PSNK
- **Project:** 14075 – Riser Island Pilling and Excavation work under the PSNK Improve project activities

DSL Caspian has experienced with working on Cold Tape Wrapping activities on offshore / Onshore facilities by using of CANUSA Global Transmission Sleeves, 3-layer high performance cross-linked polypropylene heat shrink sleeve system for the girth weld protection of PP coated pipelines.

DSL Refractory team worked 24/7 on the SRU Boilers on Tranche's 1& 2 with the assistance and guidance of the Gouda reps. They were able to complete the refurbishment of both boilers with installation of the ceramic paper, ferrules blocks & cement works in both boilers. With the complexities of working confined space and the natural hazards associated with this type of work the workforce carried this out with a safe and professional attitude ensuring the task was completed in a timely manner.
